

Because every classroom should have... crystal-clear multimedia audio

The Mini Media System is designed to complement projectors or flat panel displays to provide high quality playback of multimedia audio. The CA-30 amplifier is the perfect solution for evenly distributing music and other auxiliary sound throughout a classroom at an affordable price. Once added to your classroom, upgrading your system with voice amplification is quick and simple.

- **Flexible.** Mount the amplifier inside a cabinet, on a projector pole, or in a plenum-rated ceiling enclosure.
- **Crystal-clear sound.** Experience ideal audio for your multimedia devices.
- **Truly affordable.** Fits any budget.

Designed for today's technologies

By connecting all media devices (CD and DVD players, MP3, iPad and more) to the CA-30 amplifier, the teacher's multimedia presentations will not have to compete for student attention. Students will hear their instructors' media with clarity.

Mini Classroom System

The Mini Media System can be upgraded to the Mini Classroom System, which includes a teacher microphone and receiver. The teacher microphone evenly distributes the teacher's natural speaking voice throughout the room.

The CA-30 System features:

- One 3.5 mm input with volume control
- 16 Watts of power
- Simple installation
- Slim & compact design

Features / Specifications

CA-30 Amplifier

- Powers 2+ speakers
- Output Power:
 - THD @ 1% (4 Ohm load) - 16 Watts
- 20 Hz to 20,000 kHz Frequency Response
- One 3.5 mm input with volume control
- Accessory port (RJ-45) with line input
- Unbalanced line output
- 24 VDC power input
- Speaker connection
- RJ-45 input for IR-Satellite (TLD100) or XD Receiver (K-SRC14), provides both audio and power
- Dimensions: 4.25 in. (L) x 3.625 in. (W) x 1.25 in. (H)
